PROFESSIONAL EXPERIENCE

IT Support Technician - Intern

WonderTech Services | Mar 2025 - Mar 2026 | Sfax, Tunisia

- Typically handled approximately 10 Level 1/2 support tickets per day and repaired or restored 3-10 computers locally, covering Windows systems, hardware, software, printers, peripherals, and network-connected devices; prioritized incident queues against SLA requirements and restored workstation functionality through structured troubleshooting.
- Installed, configured, and troubleshot Windows operating systems, Microsoft 365/Office applications, diagnostic tools, and connected devices; supported Active Directory account setup, access permissions, Remote Desktop assistance, and end-user guidance.
- Managed service requests, ticket follow-up, escalation, and resolution tracking; maintained IT asset inventory and technical documentation, and documented recurring incidents and proven fixes for faster resolution.

Sales & Cashier - Commercial Manager

Tunisie Telecom - Commercial Agency | Jul 2023 - Dec 2023 | Sfax, Tunisia

- Delivered customer service in a high-volume commercial environment, resolving inquiries and service issues while explaining products and solutions clearly and professionally.
- Supported prospecting, field marketing, door-to-door sales, follow-up, and relationship building during a 6-month commercial assignment.

IT Technician

Proximedia Informatique | Feb 2022 - Aug 2022 | Sfax, Tunisia

- Performed preventive and corrective maintenance during a 7-month IT technician assignment, supporting business computers, laptops, and peripherals and restoring reliable workstation operation.
- Installed operating systems and software, configured devices to client requirements, completed hardware upgrades, and applied system updates to improve workstation performance.

Database Administrator

Tunisie Telecom - Central Agency | Aug 2021 - Dec 2021 | Sfax, Tunisia

- Entered and verified customer data with attention to accuracy, integrity, confidentiality, and operational consistency.
- Supported database and data-quality activities during a 5-month assignment; coordinated service requests with commercial teams and processed SIM-card reactivations requiring careful validation and customer communication.

SELECTED PROJECTS

Software, SaaS and AI Automation Projects

Independent Projects | 2024 - Present | Remote

- Built StayPilot, a reservation and guest-management SaaS covering bookings, payments, customer records, calendar synchronization, authentication, and workflow automation.
- Developed Flutter/Dart web and mobile solutions using Supabase, Firebase, SQL/NoSQL databases, REST APIs, n8n, and AI/LLM integrations across Android and iOS.
